You Don't Have to be a Lumber Expert to See That Our Stock is Good

Our entire stock this spring has been selected with the greatest care.

We wanted every load, large or small, that left our yard and sheds this year to give entire satisfaction.

That isn't an easy ambition to satisfy, but we believe we've got the stock that will do it.

We had very little old stock left over, so practically everything is bright and new, and it's all dry.

You can easily see the quality yourself—it sticks out everywhere. Of course we have different grades, so you can get the very best stock, or cheaper stock just as you want or need.

Our price on your bill will look good to you, and the quality of the stock will please you we're sure.
