## Best Quality Robes

Have you been looking for a good robe, not an ordinary common robe, but something just a little different and better than the ordinary robe—a robe that will keep the wind and cold away from you when you are driving—a robe which is light in weight but large in size, and one that will not tear to pieces after having been hard usage for some time? If you are looking for the best robe that you can get and for small money, then send us a horse hide or cattle hide and we will tan and line it up into a nice, warm and windproof robe for you. Cost of tanning and lining horse and cattle hides into robes, \$8.50 to \$11.00, according to size and lining used. Cost of tanning and making horse and cattle hides into fur coats complete, \$12.50 to \$15.00. Cost of tanning hides into harness leather, 15 cents a square foot.
