
HORTICULTURE

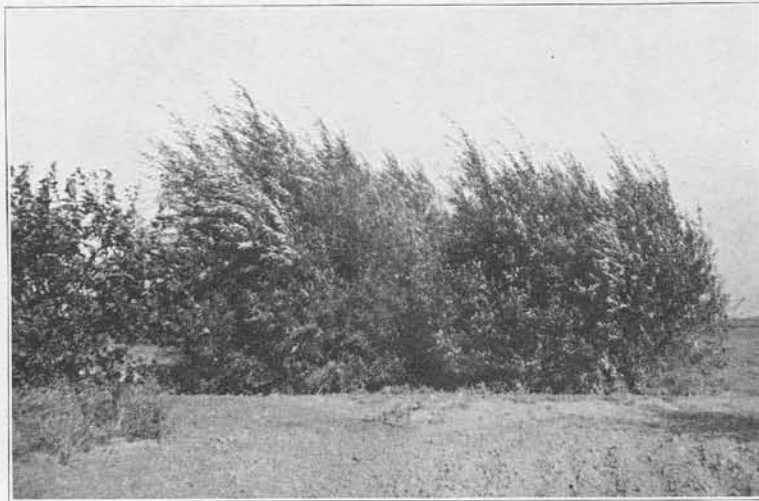

THOMAS M. McCALL, B.S.A.
Iowa State College
Fruit Growing, Vegetable Crops
Forestry, Floriculture, Asst. Prof. Hort.
CROOKSTON, MINN

THE courses offered in Horticulture include the following: Fruit growing, Vegetable and Root Crops, Potato Culture, Farm Forestry, Plant Life, Plant Breeding, and Floriculture.

The experiment station greenhouses furnish an abundance of material and ample space for laboratory work in the plant study courses. The experimental orchards, the station windbreaks and the campus collection of trees, shrubs, and flowering plants furnish a wealth of material for practical work and observation of the subjects included.

The results obtained from the experimental plots of potatoes sugar beets, vegetable, and fruit crops are made use of in the crop subjects offered.

Great emphasis is placed on the building up of farmsteads through the planting of trees, shrubs, fruits, and flowers. The æsthetic as well as the commercial value of trees, fruits, and flowers is considered.
