Home Management
Instructor of Home Economics and
Matron of Dining Hall
DULUTH, MINN.

THE courses of study are designed for the following purposes:
a—To train students in the duties of citizenship and community activities;
b—To prepare the girls to be efficient home-makers;
c—To give them a foundation for future study in home economics subjects.

Domestic science is an art in itself, and as one author says, "If you are an artist in the kitchen you will always be esteemed." It is the aim of every girl who takes a course in domestic science to be an artist in this particular line.

Cookery is a necessary art. It is an art that is worthy of the attention of the most intelligent and cultured women of the land. The people who make a study of foods realize that our muscular and nervous systems are made up
