*RUTH SHELDON, B.S.*, Univ. of Minn. School Nurse. Arcadia, Cal.  
Subjects: Public Health, Physiology, Home Nursing.

The courses in Home Economics are so arranged as to give training in foods, clothing, and home management. These courses provide a foundation for several lines of work as well as for home-making. Girls with Home Economics training are given a preference in hospitals as Home Nursing, Physiology, and Public Health are included in the curriculum. The field of Home Economics is growing rapidly, and since good homes and healthy families are requirements for happiness and prosperity, Home Economics cannot be too greatly stressed.
