The Freshman Class was organized last fall with an enrollment of 87. The class soon indicated that it not only excelled in numbers, but in class spirit and enterprise as well. At the outdoor festival, held in October, the Freshmen tied for second place in the athletic events; and at the song contest in December they placed third.

With the increased Freshman enrollment of

this year, a new spirit of optimism has permeated the school, which in the past few years has felt the depression chiefly in terms of smaller Freshman enrollments. Further, the enthusiastic manner in which this class has applied itself to its duties leads one to believe that that education is best which most perfectly interprets the environment of the learner so that his daily life may be made more meaningful and complete.
