

## RODNEY LINDSTROM

FORWARD (Captain)

If playing a good game, being a good shot and an aggressive floor man is of any importance, you can understand how important Rodney is on the Aggie five, for he has all these virtues and then some.

## CARMEN EEG

CENTER

Carmen is the center of attraction at a game for he plays at the position of center and he is an attraction when he is looping them in down under the basket.

## THEOS MORCK

GUARD AND FORWARD

Theos decided he also wanted a letter in basketball so he went ahead and earned one. He is a good shot and as nice a player as we have ever seen, with his ability to dribble and take the ball away from his opponent.

## RALPH SHELDON

GUARD

Perseverance added to his natural ability as an all-around athlete, makes Sheldon one of the outstanding players. When he guards it's pretty difficult for his opponent to make a basket.

## RICHARD JOHANSEN

"Rick" has height and a lot of basketball talent which we are counting on to be a big asset in the 1935 team.

## CLARENCE WECKWERTH

GUARD

"Weck", another man who determined to win a letter in basketball after winning one in football, played a great game at guard. His speed, combined with his fighting spirit, made things uncomfortable for his opponents.

## ELMER ROSS

GUARD

Perhaps one of the most versatile men on the team, Elmer played an excellent game at guard, and could likewise thrill spectators by his long shots. With two years left to play, prospects seem exceptionally bright.

## DEAN HENG

GUARD

A newcomer from Crookston, Dean soon demonstrated his ability to break through and get the ball to the basket. Speed and good control of the ball were his outstanding abilities.

## STANLEY ALSETH

CENTER AND FORWARD

While off the basketball floor Stanley aims to take life in a rather easy manner; when he dons a basketball outfit, he demands action and does his part in creating it.

## OSCAR LARSON

FORWARD

Larson was usually sent in whenever height and speed were needed. With an accurate eye for the basket, his shots were usually successful.
