

## 4-H Club

The year 1934 was a good club year in Minnesota. More interest was shown in nearly all northwestern Minnesota counties, resulting in more effective work as well as increased enrollments. Effective leadership and strong club organizations in the counties made this program possible. Nearly all counties had part or full-time club

leaders during the early spring and summer. More state, district and county leader training schools were held to acquaint the workers with the program. The demand for trained leadership will increase in years to come. Club members are fitting themselves for this leadership by acquiring a good education.
