

ORN by internal strife—it is thus that we found Europe during our Senior year. At the same time, the people of America gave President Roosevelt a vote of overwhelming confidence, and the students of the Northwest School of Agriculture have given us, the Senior Class, their confidence by putting in our hands the work and pleasure of recording the events of the school year in this 1937 RED RIVER AGGIE.

It is the hope of the staff that in presenting these events in four parts of six weeks each: The Overture of the first six weeks; the March of the second; the Waltz; and the Finale of the school year, we shall have fulfilled that confidence by adding to the pleasant memories of the years following graduation.
