

STUDENTS AT WORK

Studying microscopic organisms in Biology and Cereal Crops classes.

Applying principles discussed in Farm Management.

Students learn to work with motors in the Motors and Tractor classes.

In the Carpentry class students learn to work with wood and learn the use of wood-working tools.

Girls learn to cook with modern equipment.

Girls learn to be efficient housewives by mastering the art of sewing.

In Dairy production the boys learn the fundamentals of milk testing and management of a dairy herd.

Both girls and boys learn to raise poultry profitably.

Livestock projects are popular in 4-H Club work.

Oh, oh—somebody sick. Oh, well, send him some flowers.
