

DEDICATION

The Senior Class of 1940 realizes the opportunities for training and personal development which have been provided for us through the complete curriculum which has been set up and maintained by the administration and departments of the Northwest School. Its curricular and extra-curricular programs have been such that we feel that we can meet with some degree of confidence any obstacles that may confront us in the future.

We wish to express in a concrete way our appreciation to those with whom we have been intimately associated for three years and who have been interested in us from a personal, as well as from a professional point of view.

It is with gratitude for their unfailing help in reaching the goal for which we have been working we dedicate the 1940 Aggie to the entire faculty of the Northwest School.
