

SCHOLARSHIP HONOR ROLL

The following students have maintained the highest scholastic averages in their respective classes. The numerical score is based on the number of honor points divided by the number of credits carried by the student. The honor point value of a grade of A is three, of a B two, and of a C, one. The highest possible numerical score would be 3.00. The averages given here are based on work through the first term of 1942-43.
