

## ASSOCIATE DIRECTORS

**W. M. Barron**

**Fay Hughbanks**

**A. M. Foker**

**H. W. Soderburg**

In Owen Hall we find these three mechanically minded gentlemen plus commercially minded Miss Hughbanks, fascinated by a welding torch held by sociable Mr. Soderburg, who devotes much of his talent to such vital equipment. The question uppermost in the minds of many of Mr. Barron's students is whether his grandchildren or motors occupy the majority of his time. Dry humored and quick-witted Mr. Foker is kept busy making regular rounds of the campus since his official capacity is Superintendent of Buildings and Grounds. A common expression heard on second floor of Owen Hall, above the drone of saws and lathes, is "Keep your eyes off the keyboard!" faithfully enunciated by efficient Miss Hughbanks.

**O. C. Soine**

**John Ward**

**B. C. Beresford**

Because of a profound knowledge of agronomy, Dr. Soine's classes turn out better prepared farmers. Mr. Beresford, who has a way with flowers, demonstrates to his horticulture class how it should be done. Versatile and active Mr. Ward has proved a valuable addition to the science department. Of course, he will best be remembered as Susie's father.

**H. D. Fausch**

**A. M. Pilkey**

**O. M. Kiser**

Mr. Kiser through his livestock experiments has brought national recognition to the school. Mr. Fausch, his able assistant, has demonstrated a keen interest in his work and in his students. Mr. Pilkey, like Mr. Kiser, has given years of service to the school. He has conducted many worthwhile experiments in connection with his poultry work.
