

## Leather Craft

Each year more and more people are becoming interested in leathercraft. The students at the Northwest School are also enjoying the pleasures of working with leather. This introductory class will, it is hoped, aid in the development of worth - while hobbies among students so that they may make better use of their leisure time.

Projects undertaken by the students have been key cases, belts, billfolds, bond cases, notebooks, purses, and coasters.

Fundamental operations including design and template cutting, preparation of leather, outline tooling, embossing, carving, and lacing have been studied.
