

in many ways

Because the Northwest School offers its students such a wide and diversified education, *The Aggie* is proud to record the many ways in which we are educated. Although the class work offered is the reason our school exists, our learning doesn't stop when the bell rings. Throughout *The Aggie* the reader will find countless occasions and activities which are aimed at developing versatile, more intelligent, and better adjusted individuals.

Each division in the book will show the different ways in which our school develops its students.
