

Very likely the first person we meet when we register is Mr. E. N. Reiersgord. He plans the schedule of each student with an insight into each student's needs and desires.

Mr. Reiersgord's job is no easy one since we must learn in six months what other high school students achieve in nine. This remarkable feat is helped by the careful planning of our registrar.

Aside from his job as registrar, he teaches algebra, biology, and advises the National Honor Society.

Mr. Reiersgord
