## Seniors

*Nearly four years ago 98 uncertain and shy people, given the title of students, entered the Northwest School to learn and understand better themselves, and their environment. Within these four years a few left but more transferred to Northwest making up a class which now numbers 110 united through a common four year past.*

*Through the trials and frustrations of our freshman year we progressed; taking part in more activities as years went on. As sophomores we were given the privilege of putting on the junior and senior banquet. The prom theme for our junior year was "Memories Are Made of This." The other significant activity was the play "Miss Jimmy." We were busy in our junior year but we were challenged even more in our senior year, which included such activities as being in charge of the Aggie, and the school paper, the Rouser.*

*We are now leaving, hoping that you will enjoy your years as much as we.*
