

WE BUILD FOR TOMORROW'S WORLD

Northwest School and Experiment Station is founded on the faith that men are enobled by understanding. It is dedicated to the advancement of learning and the search for truth. It is devoted to the instruction of youth and the welfare of the state.

This year we celebrated two great events: the 100th anniversary of admission to statehood of the state of Minnesota and the 50th anniversary of the first graduating class of the Northwest School. It is, therefore, fitting that we should dedicate this annual to the principles that create great men. As we uphold and fulfill these principles, the results are:

1. The development of a sound body.
2. The development of the mind with an interest to search for truth in the various fields of knowledge.
3. The development of the Spirit with the hope that each student will strive for good and right and, thereby, make a worthy contribution to his society and the world.

We, too, will strive to grow in these areas that we may uphold the tradition of our great state and school.
