

Mr. Beresford's 10:45 horticulture class.

Here we find three sophomore boys: Robert Neset, Gary Dagen, and Darrel Anderson. Probably they came here out of intellectual curiosity concerning the growth and propagation of plants, or maybe they're here just to see how the bananas are coming along. At any rate, we know why Mr. Beresford is here.

Dale Helm and Allard Carlson hold a chart showing the life cycle of a frog while Mr. Beresford lectures.
