

# EXTRA CURRICULAR DEPARTMENTS

The importance and significance of the extra-curricular activities; music, sports, and cheerleading, are given strong recognition by our school because of the part these co-operative and individual competitive activities have in developing a well rounded personality.

The extra-curriculars, for the most part, teach us to work together as a group. Such co-operative and united working together is good and necessary training to become a worthy citizen of a great democracy.

The variety of the extra-curriculars is great enough so that every student with desire can easily find one to suit his interests.
