One of the most active clubs on the campus is the Carpentery Club. When there is a job to be done requiring the skillful hands of a carpenter, this organization swings into action and gets the job done.

This past year the club gave needed assistance to the class plays, Christmas concert, Winter Shows, Homecoming, assembly program, and special construction projects.

This year we organized Operation "Christmas sled" which provided Homemaker groups throughout the valley with a homemakers Christmas project.

The club holds a regular meeting Monday evenings, but has access to carpentry shop and equipment at all times.

Our purpose is to provide service to our school and ourselves and develop greater skills in the field of carpentry.

PHOTOGRAPHY CLUB

The Photography Club was organized for the third time October twenty-one, 1958.

This club was organized to teach its members the elements of photography, how to develop and print pictures, and how to show movies.

It meets every Tuesday from 4:00 to 5:00. The only requirement to belong is interest in the fine art of photography.
