

# Educational Leadership and Set Standards

After listening all day to the tall tales of the many students that come into his office, and dealing with discipline problems with stern but sympathetic ear, our active principal never seems to tire. Needless-to-say, because of his position at this school, he is called upon to lend a helping hand whenever it is necessary.

One of the many interests of Principal Reiersgord is German. Because of his interest in students and interest in German along with a desire to know his students better, he is teaching first and second year German.

Among the activities that take place in German Class, are reading and translating various selections from the textbook, memorizing poems and writing sentences on the board.
