

Mrs. Pearl Jamieson, the resident head in Selvig hall is shown in a familiar pose at her office desk.

## Freshmen

Freshmen learn very soon after their arrival on campus that they must become aware quickly of what is going on.

A sight that is not too unusual the first few days of school is to see a jolly group of these merry little fellows scampering on their way to the most remote areas of the campus with uppermost thoughts in their heads of going to some class. Alas, to their dismay, they very soon discover that they are heading toward the root cellar, or even the animal barns. Fortunately for them, they soon learn their way around the campus and learn to avoid the practical jokes of the upperclassmen.

It doesn't take long for the boys to gain enough self-confidence to start such mischief as water fights, a few fist-fights along with such mild activities as tearing up beds, peeping out the door during study period, and just being boys.
