

Two of the projects undertaken by the carpentry classes this year are building a garage and playhouses.

MR. MENZHUBER, Crookston, Minnesota.
B.S., Moorhead State College, M.E. University of
North Dakota.
Carpentry, Mechanical Drawing, Carpentry Club.

Carpentry

Mr. Menzhuber teaches the carpentry classes as well as being the advisor for the Carpentry Club. The industrial arts training program provides a well equipped woodworking shop where boys can learn many practical skills and how to apply what they learn. Some boys apply their skills building projects that can be used at home, while others build brooder houses or hog houses that can be used at the experiment station. Mr. Menzhuber is also an able teacher of mechanical drawing.
