

A new addition to our faculty this year is Mr. Arthur Vraa, a native of Climax, Minnesota, and a Concordia College graduate. Mr. Vraa's teaching duties include biology and drivers training. In addition to these duties, he is the head counselor in Robertson Hall and assistant football coach.

Biology

Biology is a course usually taken by Sophomores. In this class, students learn to identify living things according to phylums and classes. The structures and functions of living things are taught from the simple algae to most complex animal of all--man. Mr. Vraa, the Biology instructor is new on the faculty this year. He is diligently working with his students to help them gain knowledge about the growth and development of living things.

Horticulture

Mr. Beresford's special class is horticulture, due to the fact that he is the chief research man in the area of horticulture at the station here in Crookston. Because of this, there are many things of interest for the students to see and to study. He makes his classes thoroughly enjoyable and lively by telling an occasional joke and adds some indoctrination on the merits of cross country over other sports.

MR. B. C. BERESFORD, Crookston, Minnesota, B.S. Iowa State University of Illinois; Horticulture, Cross Country Coach.
