

History

History. Just what is it? Some scholars say it is the life story of all men, of their fights for freedom, and ways of life. Many say history is composed of two words, His-story. This means history is the story of God's people--the progress they made and the destruction they have brought upon themselves.

Every student who studies history will be given the chance to learn the many mistakes that our country has made and also all of the victorious happenings that have taken place in our nation since the beginning of time.

Geography

One of the newest subjects offered on campus, Geography, is taught by Mr. Bergquist. It is an interesting and enlightening subject which deals with the structure of the earth and the ways in which man adapts himself to conditions of the earth's changing surface.

PICTURED ABOVE are Mr. Heckman and several students discussing the daily assignment.

Here Mr. Bergquist is lecturing his Geography class on the topography of Switzerland.

Mr. Mazzitelli points out several historic locations to his American History class.
