

# Mathematics

Today's world presents a challenge to the youth of America as well as those of other countries. A thorough understanding of mathematics will help us to better meet this challenge. Mathematics is one of the few subjects that will help us throughout our lives. Algebra, Geometry, and Physics are subjects which demand a lot of work from students who are eager to meet the standards set by an excellent teacher, Mr. Ralph Titus.

MR. RALPH TITUS, Enderlin, North Dakota; B. S., University of North Dakota; Algebra I and II, Geometry, Physics.

Three seniors working on an experiment.
