

Our Superintendent

Our superintendent, Dr. B. E. Youngquist, has the difficult job of supervising the Northwest School and Experiment Station. His work does not end with the closing of our school term, for he is also very busy keeping the agricultural experiments running smoothly during the summer months.

The Northwest School is a branch of the University of Minnesota. Through its school and experiment station it is doing a commendable job in improving methods in the Northwest.

Our Technical Institute Director

Appointed by the Board of Regents of the University of Minnesota as the director of the newly established University of Minnesota Technical Institute, Dr. Stanley Sahlstrom has the responsibility of developing administrative and curricular activities for the college that is scheduled to open in the fall of 1966.

Offerings at "University Tech" will be built around a liberal arts curriculum with courses in agriculture and business.

DR. B. E. YOUNGQUIST: B. S., University of Minnesota, College of Agriculture; M. A., Ph. D., University of Minnesota, College of Education.
