

MR. EUGENE C. MILLER, Crookston, Minnesota; M. A., University of Minnesota; Superintendent of Buildings and Grounds; Electricity, Aeronautics.

## Electricity & Engines

In electricity class, Mr. Miller shows many films because he firmly believes in the old saying, "A picture is worth a thousand words." These films show many relationships and theories which would normally take many class periods to explain. The most interesting part of the class demonstration is the circuit demonstration board which shows parallel and series circuits as well as ammeter and volt-meter circuits.

Engines is an interesting and informative class that seems to be very popular with the boys. Mr. Diehl teaches various facts in the care and repair of motors. In the classroom, work is concerned with a variety of important facts and figures. The work in the shop is the most enjoyable for it consists of the actual repair and overhauling of engines.

MR. RODGER DIEHL, Hillsboro, North Dakota; B. S., North Dakota State University; Engines.
