

Livestock

The Experiment Station has all four classes of livestock including the raising of some 90 litters of swine, the handling of an 80-cow dairy herd, - about 90 head of beef feeders and about 300 ewes. The Sheep Project is changing considerably. All of the present sheep will be disposed of and a little better than 400 sheep of three breeds will be brought on the Experiment Station for a long-time Heterosis study.
