

Freshmen are great people

Freshmen. The white hope of every college, the vision of the future. This year's class at Tech was unique in several ways: greater in number, more diversified ethnically, gathered from other areas of the United States and Canada. They are an interesting and talented group, this class of 1970. Many excel in sports, scholarship, leadership, and the arts. The men still outnumber the women, to the advantage of the ladies and the frustration of the gentlemen in the dating game. They have survived mountains of homework, reports, homesickness, tough tests, and breaks and sprains. Vive les frosh!
