

Ag division men

Harland Hasslen, M.S.
Chairman, Agricultural Division

Tech's most populous study area is agriculture, with an overall enrollment of more than 200 each quarter. With Harland Hasslen as chairman, the division offers four basic courses of study: agricultural production, agricultural business administration, agricultural technologies, and agricultural engineering technologies. In ag production a student may major in animals or crops. Business administration gives him the alternatives of management or finance. Technologies include aviation, animal or crop science, horticulture, soils and fertilizers, or wild life conservation. Engineering technologies options are sales management, engineering research, or soil and water conservation.

Bruce Beresford, M.S.
Horticulture

Gaward Caveness, M.S.
Ag Engineering

Peter Fog, M.S.
Soils, Agronomy

David Hoff, M.S.
Economics

James Lofgren, Ph.D.
Agronomy

George Marx, Ph.D.
Dairy Science

Eugene Miller, M.A.
Ag Engineering

Harry Soderburg, M.S.
Ag Engineering
