

Dan Skolness, Curt Brekken, Mr. Caveness, Dick Adams, and Gerry Olsonawski find out what makes a tractor tick.

Mr. Beresford helps Sheldon Bolstad, James Bingham, Allen Amiot, and Earl Hunt identify plant life.

Flying sparks and Harvey Zachman. The class is fabrication of metals.

Soil, wildlife Interest some

The Agricultural Division sponsored an Activities Day for members of FFA and 4-H in late January. Almost 500 girls and boys from Northwestern Minnesota and North Dakota swarmed the campus for contests, talks, and clinics. Purposes of the project were to teach judging procedures and criteria and to acquaint the visitors with the college's programs in agriculture. Chairman Hasslen termed the day "an unprecedented success".

The annual Winter Shows gave campus ag students many opportunities to participate. Some had exhibits of their own; others babysat animals, helped with grooming and judging, and assisted with showing. Practical experiences like these give the majors necessary expertise in the fields they have chosen.
